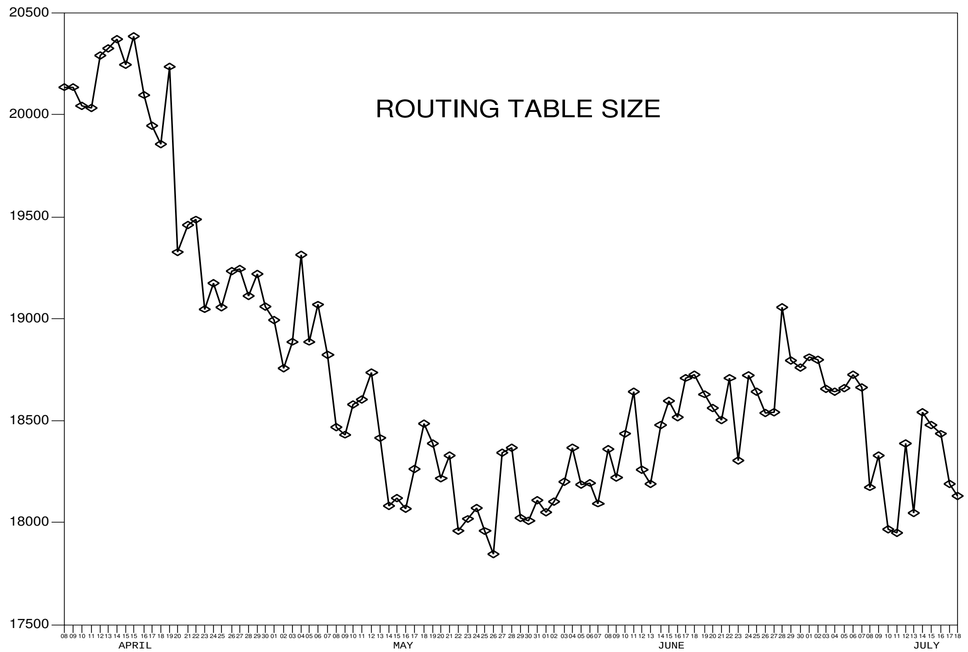
CIDR
PROGRESS
REPORT

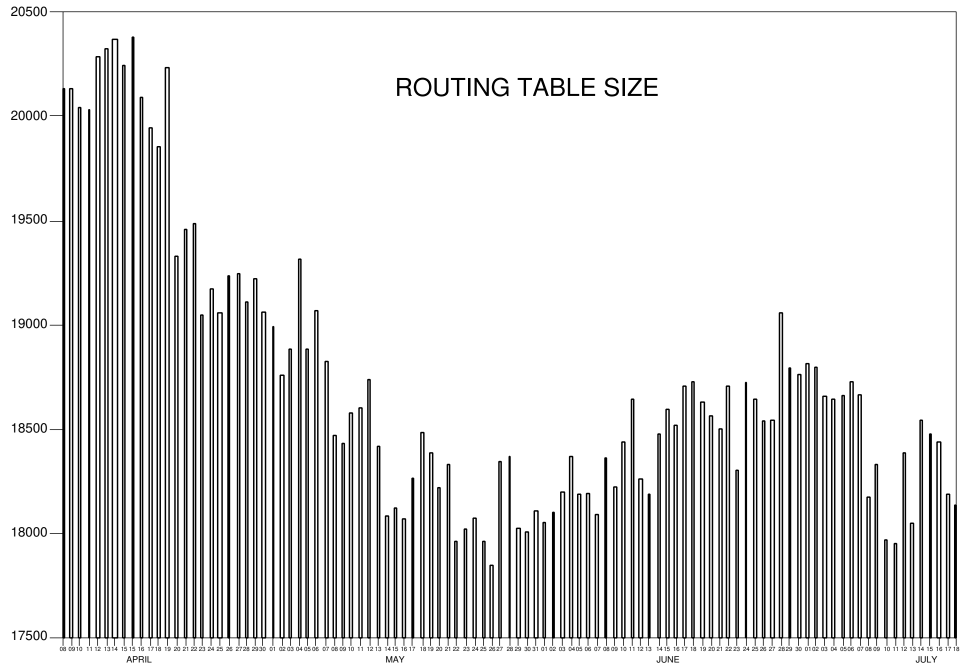
- o Caveats
  - o not very detailed
  - o no projections
- o Based on data from:

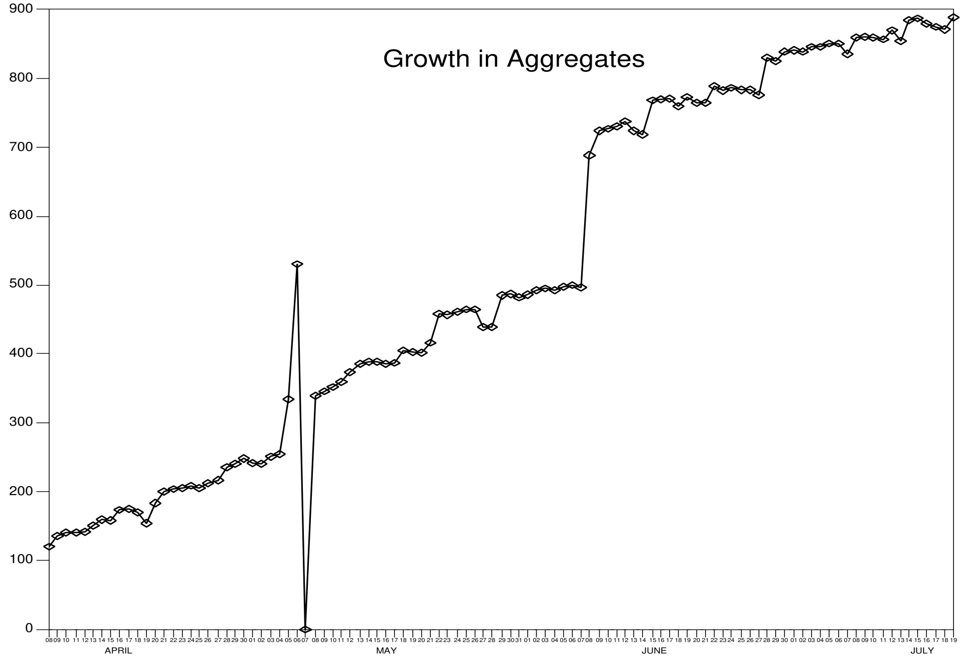
  ftp.ripe.net:cidr/stats

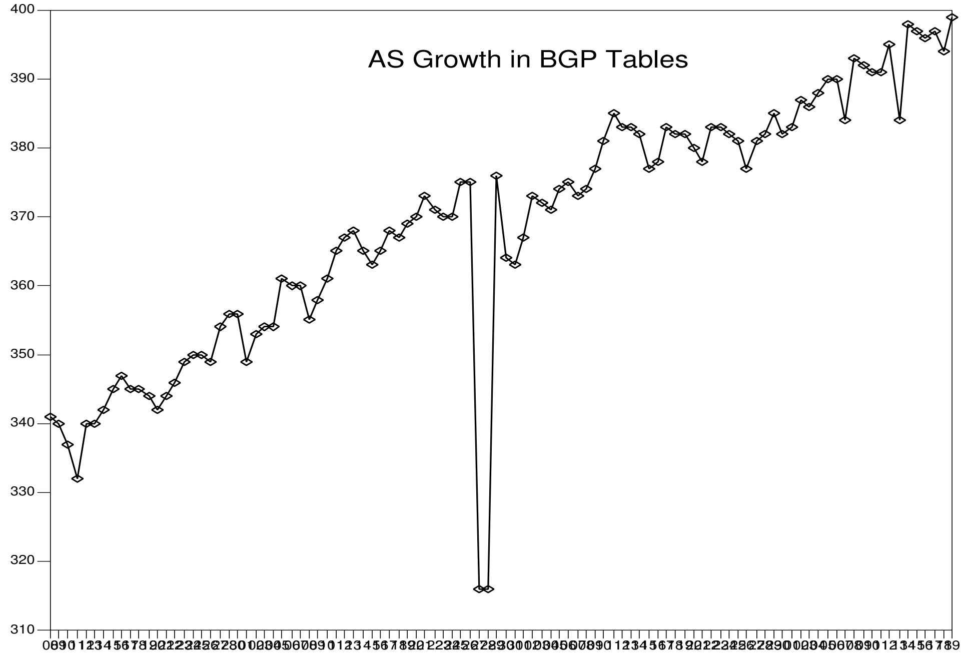
- o Disclaimer

  "I am not a member of the CIDR police squad and I don't play one on TV either"



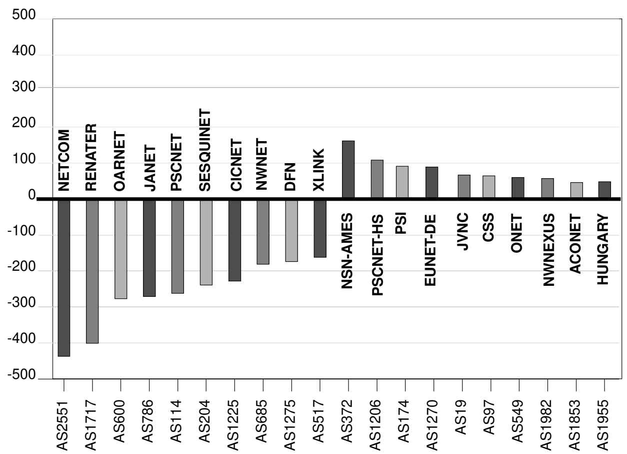




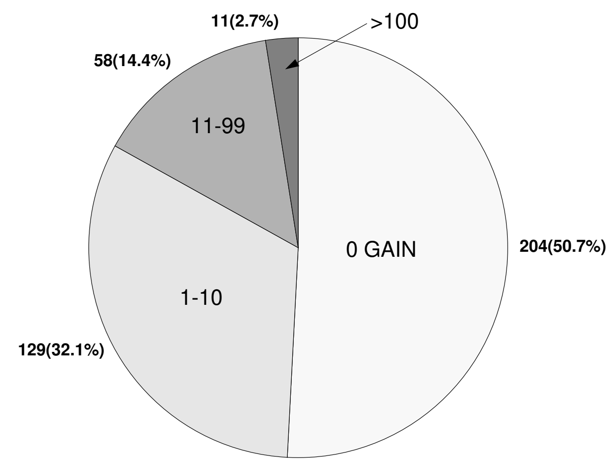


Deltas from 8th April to 19thJuly, 1994

'Top and Bottom 10' classful route 'withdrawers'



Distribution of gains to be made by AS aggregation



Other bits

- "Top 10"....what's this stuff each week ?
    - just an indication of possible gains based on aggregation at the AS level without holes
- 'Sort of' works....
- Time for something else perhaps ?

ftp.ripe.net:cidr/stats/AS-agg.*

- Deltas - just a snapshot

ftp.ripe.net:cidr/stats/Delta.*

Other Bits

- Summary of all cidr aggregates in routing table
    - details of less specifics
    - how much address space is being used

ftp.ripe.net:cidr/stats/Specific.*

- Routing Tables kept
    - up to two weeks

ftp.ripe.net:cidr/data/*
