Discussion of

`draft-ietf-idr-autosys-guide-02.txt`

Motivation (for discussion):

* Operational “coercion?”
* AS space exhaustion?

draft-ietf-idr-autosys-guide-02 discussion.

Overview of document:

- Introduction
- Motivation
- Definitions
- Common errors
- “Do I need an AS?”
- Sample Cases
- Other factors
- Speculation
- One prefix, one origin AS
- IGP issues
- AS space exhaustion
- Security Considerations

Controversy!

- Peter and Bill feel the draft restricts operators too much.
- Silent masses (see back of room) don’t say anything
- Tony & John think the document provides a useful (perhaps overly pragmatic?) way to discourage wasteful/excessive/flap-causing practices.
